

JeTSI Celebrates 10 Years 2003 - 2013

June 5, 2013

Herndon, Virginia– Jeffries Technology Solutions, Inc. (JeTSI) is pleased to celebrate their 10th Anniversary today!

Leslie and Alan Jeffries, the principal owners, officially incorporated JeTSI on June 5, 2003 in Herndon, Virginia with a commitment to provide exceptional response and service to clients, a challenging and fun work environment, and mutually beneficial relationships within the space operations industry. In the past ten years, JeTSI has enjoyed contracts with various government prime contractors and worked on some exciting projects such as:

- Joint Polar Satellite System (JPSS)
- Suomi National Polar-orbiting Partnership (S-NPP)
- Space Communications and Navigation (SCaN)
- Space Network Ground Sustainment System (SGSS)
- Solar Dynamics Observatory (SDO)
- NASA Review Teams (SRBs and IRTs)

JeTSI's unique business model provides senior engineering services using teleworking employees. We work from home and at client work sites as necessary. Our team of highly skilled systems engineers has the technical training and experience to meet the needs of client projects. Sometimes this means a person working on the project full time, but often the project need is met with fewer hours providing the client with the specialization to meet the requirements without the cost of paying for a full-time employee. JeTSI matches the engineers' skill sets and availability with the clients' project requirements and schedule providing a win-win solution.

Leslie and Alan are thrilled to lead a team of some of the best in the business. "Our goal is to provide our clients with superior service, quality products, and on-time delivery at a reasonable cost and, at the same time, empower our employees with the ability to balance their lifestyle while engaging in interesting, challenging projects."

"Through JeTSI, we are also able to contribute to the education of American's youth through our JeTSI Gives Back program," Leslie continues. "It is encouraging to witness the excitement of an elementary classroom write a tablet app, enter a competition, and win! We want to foster that love for science, technology, and innovation which we experienced and, hopefully, see more of our young people enter these fields."

JeTSI is a woman-owned engineering consulting firm specializing in the aerospace industry. It provides diverse services in systems engineering and architecture, program management, software development, and custom hardware solutions.
